

Natopia

Beitrag von „Brandon Sullivan“ vom 13. August 2007 um 22:17

Well, at the moment we have claims on both. They are alright at this point with eachother enough to allow that. However, they tend to be useless now. They kind of give us backing to create our regions. Lesser governments and divisions have always been a part of Natopia for better or for worse, however useless they have proven themselves. Now, though, they seem to be a bit more useful if they had been, if that means anything.
